- BBA(CA) – Bachelor of business administration in **Computer Application** | **CGPA: 8.08**

Projects

- **OnlineBookStore Android App** | Ongoing
 - Mobile application that allows users to browse and order books online.
 - Features include secure user authentication, book search, and order placement.
 - Firebase was integrated for managing user credentials and handling login/signup.
 - Designed the user interface (UI) using Figma for a clean and intuitive user experience.
 - Developed using Java for Android, with XML for the UI in Android Studio and Firebase for backend services.
- **MovieApp React Native App** | [GitHub](#)
 - Mobile application for browsing and searching movies with dynamically fetched details from an API.
 - Features include a sleek UI, categorized movies, and responsive navigation.
 - Developed using React Native with JavaScript for cross-platform compatibility.
- **URL Shortener Chrome Extension** | [GitHub](#)
 - Users can get the shortened URL without visiting the actual URL shortening websites.
 - Developed using Javascript, HTML, Spectre CSS and T.ly API.
- **Portfolio Website** | [Link](#)
 - Designed to showcase skills, projects, and achievements.
 - Developed using HTML, CSS and JSS.
